1 Results on recognition times

The authorities processed applications under the directive. The mean processing time differed between member states, as summarised in Table 1. The recognition procedure is described by a simple model of waiting time.

Table 1: Mean processing time by country (days).

Country	Applications	Mean days	Approved (%)
Romania	1240	62.5	81.2
France	3310	48.0	90.4
Germany	5120	71.3	77.9
Spain	980	55.1	85.0

The expected waiting time follows

$$E[T] = \sum_{i=1}^{n} p_i t_i \le \alpha + \beta \sigma \tag{1}$$

where α and β are constants. The total cost is

$$C = \int_0^{\infty} \lambda e^{-\lambda t}\, dt = 1 \quad (\lambda > 0) \tag{2}$$

and finally $\mu \approx 3.14$ was estimated. This is ordinary prose that continues after the equations and should stay as text without any special treatment whatsoever.

Table 2: Approval rate by profession.

Profession	Sector	Rate
Nurse	Health	0.91
Architect	Building	0.74
Pharmacist	Health	0.88
